Oracle, SQL Server, Windows, Mac, JavaScript, iOS, WPF, Android, Windows Mobile, jQuery, .NET, Dojo, HTML 5, ArcGIS Platform (Desktop, Server, Mobile, Online, Portal)

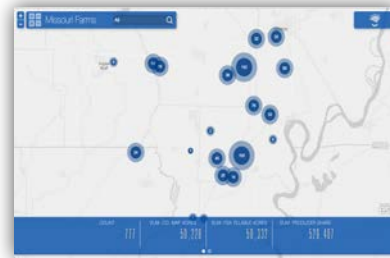

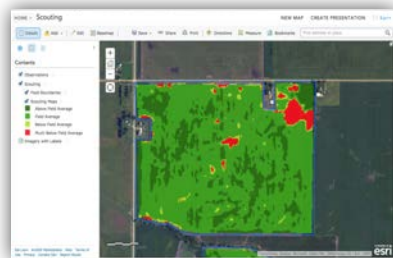

Agriculture companies, large and small, rely on Swova to help them successfully implement Esri's location platform to support their data integration, management, and analysis workflows as well as web and mobile application needs to improve how they do business.

Challenge

Having a robust understanding of the land, resources, and climate that your crops rely on improves decision making. All of this information involves location and accessibility to this information can be a challenge. Integrating, managing, analyzing, and sharing this information can be a daunting task without dedicated and knowledgeable resources.

Solution

Swova's professional and technical services can support the planning, design, and implementation of a location platform to support data access, visualization, analysis, and reporting. We provide complete, end-to-end solutions aimed at your organization's requirements.

About Swova

Swova is a leading provider of GIS professional services and solutions, helping organizations successfully implement location technology since our inception in 2004. We specialize in the design, development, implementation, and integration of GIS, web server and database server technologies. We have experience supporting Ag companies of all sizes and our team of industry and technical experts offer an agile approach to give you optimal service and support.
