

# Swova Jumpstart Services

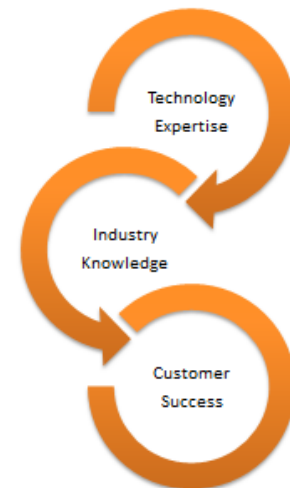

Quickly Deploy Esri's Utility Focused Solutions

## ArcGIS System Assessment Package

Many organizations have an ArcGIS System that has been in place for many years, receiving upgrades and expanding to support a growing number of data and users along the way. Maintaining a system that performs optimally is necessary for productivity and expanding the use and effectiveness of your system and data. Swova offers professional services for the review of your ArcGIS System, providing recommendations and support to achieve optimal system performance.

Our ArcGIS System Assessment package include:

- Geodatabase and ArcGIS for Server assessment of the:
  - Current system architecture and configurations
  - Geodatabase/database administration and permissions
  - Data structure and storage
- Ensure best practices and procedures in place
- Transfer of knowledge services and summary documentation

Swova Services for Utilities can be offered remote or onsite. Please ask a Swova representative to discuss pricing and service details. Contact Swova at [info@swova.com](mailto:info@swova.com) or 859.813.5153 to learn more about how we can support your GIS system and performance needs.
